SUMMARY

Full Stack Web Developer with a background in business/finance and life-long dedication to learning. Effective at adapting to new technologies and problem solving to develop user-friendly applications. Recently built an application to help businesses navigate through the changes in the economy (check Placebook below). Searching for a company environment that encourages growth of technical skills both inside and outside of the workplace.

TECHNICAL SKILLS

Languages: HTML, CSS, JavaScript, jQuery

Technologies: Node.js, Express.js, React.js, MongoDB, MySQL, Firebase, Bootstrap, APIs, JSON, REST, AJAX, Axios, Passport, Bcryptjs, ShortID, Mongoose, Sequelize, Handlebars, Materialized, UI Kit

Applications: GIT, Github

PROJECTS

Placebook | github.com/pyhurst/Placebook | plabk.herokuapp.com

- Non-industry specific reservation application to help businesses during and after COVID-19. A company can create a dynamic schedule with capacity limits per 30 minutes or hour while allowing users to reserve one spot per business per day.
- Full stack application
- React, Node, Express, Mongoose, Passport, Axios, Bcrypt, CSS, Bulma CSS, Bootstrap, JavaScript

Shelter Helper | github.com/pyhurst/Shelter-Helper | fierce-waters-27012.herokuapp.com

- Suggests a dog breed to the user based on his or her lifestyle and locates adoptable dogs of that breed in the user's city. Also, tracks this data for shelters so they know which breeds are popular in certain areas.
- Worked on all back-end and database code
- Helped with front-end and routes to back-end
- Node, Express, jQuery, Handlebars, APIs, HTML, UI Kit CSS, MySQL, Sequelize, JavaScript

To Beer or Not To Beer | github.com/pyhurst/Project_1_Brew | pyhurst.github.io/Project_1_Brew

- Suggests a Brewdog IPA beer based on alcohol percentage, color shade, and bitterness along with 2 great food pairings.
- Front-end project working with APIs
- jQuery, APIs, Materialized CSS, HTML, CSS, JavaScript

Employee Management System | github.com/pyhurst/Employee-Tracker | [CLI Application](#)

- A CLI application using Node.js that allows a company to view, add, delete, or update their employee, department, and roles data. Also an option to view the total utilized budget by department.
- Node, Mysql, Inquirer, Console.table, Javascript

EXPERIENCE

EURUSD Trading Specialist

2014 – 2019

Retail Currency Day Trading

Chicago, IL

Completed a two-year mentorship program in foreign exchange trading then broke off on my own to specialize in trading the Euro.

Key Accomplishments:

- Worked with programmers to create trading bots that execute trades under certain conditions.
- Learned to analyze data and failures to increase success rates and profitability.
- Deep understanding of business financials and the financial markets

Capital Operations Intern

2012 – 2013

COUNTRY Financial

Bloomington, IL

Worked at the head-quarters and built a database management system using Microsoft Access so management could easily monitor the current status of various projects going on in the organization.

Key Accomplishments:

- Quickly learned and used a new technology that I have never seen before
- Developed communication skills need to work in small and large teams inside a corporate environment.

EDUCATION

- **Certificate in Full Stack Web Development, Northwestern University, Evanston, IL**
 - A 24-week intensive program focused on gaining technical programming skills in HTML5, CSS3, JavaScript, jQuery, Bootstrap, Firebase, NodeJS, MySQL, MongoDB, Express, Handelbars.js & ReactJS.
- **Bachelor of Finance, Illinois State University, Normal, IL**
 - Graduated from the business school with honors
